

THE ENTOURAGE EFFECT

THE ENTOURAGE EFFECT IS A MECHANISM BY WHICH CANNABIS COMPOUNDS ACT SYNERGISTICALLY TO MODULATE THE OVERALL PHYSIOLOGICAL AND PHYCOACTIVE EFFECTS OF THE PLANT, PRIMARILY BY THE ACTION OF CBD AND THC.

" The more compounds you have the wider range of therapeutic benefits "

PRODUCT AND ENTOURAGE EFFECT

Full-spectrum CBD offers higher levels of anti-inflammation relief than isolate CBD at the same dose. The combined action of cannabinoids and other molecules in the plant may present clinical advantages, such as lower
